

Abstract of the technical disclosure

1. The time of the sunrise
2. The time of the sunset
3. The time of the southing
4. The altitude in case of the southing
 - (1) The move of one day's sun is understood by above 1, 2, 3 and 4
 - (2) "The set time" and "The set position" are decided by above (1).
 - (3) The control board of "Solar-system Movable Mount" controls the turning-over part and the elastic part(s).
 - (4) The above control board controls the above turning-over part and the above elastic part from above (2).
 - (5) The power of above control board uses the special solar cell(s) of above control board.
 - (6) When the special solar cell(s) of above control board isn't made to generate electricity, above control board doesn't operate.
Therefore, above turning-over part and above elastic part(s) doesn't move.
